Update to Delphi 13 Don't let your Delphi skills become outdated. Join our comprehensive course and learn the latest techniques to build cutting-edge applications. From mastering data access and web development to creating cross-platform apps and leveraging advanced features like extended RTTI and JSON, you'll gain the skills to take your projects to the next level saving time and money.	2 online	€ 550,00	**€ 449,00**
WebAPI with Delphi and DelphiMVCFramework "The best framework for creating web servers with Delphi! It is very easy to create Delphi servers and publish APIs and REST resources." -- cit. a happy customer DMVCFramework, the most popular Delphi framework on GitHub, empowers developers to build robust and scalable web applications with ease. This course dives deep into Web API development, showing you how to create powerful RESTful/JSON and JSON-RPC services. You'll also learn how to leverage LoggerPro and MVCActiveRecord to enhance your Delphi projects. Stay up-to-date with the latest version, DMVCFramework-3.4.3-aluminium, and unlock the full potential of Delphi.	2 online	€ 490,00	**€ 399,00**
Update to DelphiMVCFramework-3.4.3-aluminium Stay ahead of the curve with the latest Delphi features. Don't miss out on the powerful improvements introduced in the past two years. This course will equip you with the knowledge and skills to build cutting-edge applications.	1 online	€ 299,00	**€ 239,00**
DMVCFramework, TemplatePro, and HTMX: Build modern web applications quickly without JavaScript In this course, we'll explore how to use DMVCFramework, TemplatePro, and HTMX to develop powerful and flexible web applications with Delphi, while keeping your code clean and minimizing the use of JavaScript. DMVCFramework will allow you to efficiently and modularly manage the backend, while TemplatePro simplifies the generation of dynamic and scalable HTML. Finally, we'll discover how HTMX can be used to add interactivity to your applications without the need for complex JavaScript frameworks. Throughout the course, we won't just stick to theory. We'll look at practical examples and real-world use cases, with the goal of providing you with the skills you need to start creating modern, high-performance applications right away.	2 online	€ 590,00	**€ 499,00** Valid only for the session of November 26-27, 2025

PostgreSQL for Developers PostgreSQL is the world's most advanced open-source database and is growing rapidly and constantly. It offers scalability in terms of both data and concurrent users, positioning itself as a true alternative to Oracle and Microsoft SQL Server.	2 online	€ 599,00	**€ 499,00**
Machine Learning - From Theory to Practice A practical course that guides you from the theoretical concept of Machine Learning to the implementation of operational models in production. Hands-on approach with real projects and a focus on immediate business applicability.	2 online	€ 690,00	**€ 599,00**
React React is one of the most popular libraries for building dynamic and arbitrarily complex web UIs while remaining simple and intuitive to use. In this intensive course, you will learn to use all the features and capabilities of the JavaScript library born in the Facebook labs.	2 online	€ 499,00	**€ 399,00**
Truly Applying OOP and Design Patterns "This course changed my life" - said a course participant "Now we understand where we were wrong" - said a course participant "It taught us to really program!" - said a course participant Enough with theoretical OOP courses that only work on paper! If you think OOP is potentially useful but difficult to apply in everyday work, this course is for you! In this course, appreciated by dozens of programmers in recent years, the most evident flaws of "classic" design and the related solutions offered by SOLID principles and design patterns are addressed. All concepts are put into practice immediately! Finally, you can really benefit from the object-oriented approach and design patterns in your everyday work.	3 online	€ 799,00	**€ 649,00**
Leveraging AI and LLMs: From Technical Foundations to Business The goal of the course is to provide practical skills to select, implement, and integrate local LLMs in business contexts, highlighting their advantages, limitations, and requirements. The course focuses on local Large Language Models (LLMs) for enterprise applications. It is designed to be hands-on, avoiding theoretical or mathematical deep dives, and aims to help participants understand which systems to use, their benefits, limitations, and the necessary requirements for effectively implementing local LLMs in a business setting. The structure is divided into modules with hands-on activities to ensure practical learning.	1 online	€ 490,00	**€ 399,00**

* Discount valid only for ITDevCon participants, not cumulative with other offers or discounts on the site.

N.B. All prices are exclusive of VAT. Standard courses are only delivered when the minimum number of participants is reached. Customized courses (for dates and/or content) can be delivered both remotely and in person without restrictions on the number of participants. Depending on your needs, it is possible to define a customized training program. Customized courses do not benefit from the additional 20% discount.
